Lac Achard - Chamrousse

Water · Isère

GPS coordinates	45.11375, 5.90309
Elevation	1,917 m
Maximum height	120 m max
Access	On foot > 1,000 m
Nearest aerodrome	Altiport du Col De Belledonne 8.9 km NE · spot 883 m lower
Spot reference	316979

Altiport L'Alpe d'Huez - Henri GIRAUD	Aerodrome	15 km E	1,860 m
Hôpital Nord Heliport	Heliport	16 km NW	218 m

Description

Lac Achard, with the feel of the Canadian Rockies! A pretty mountain lake at 1,917 meters altitude, easy to reach in summer on a hike from Chamrousse 1750 (Roche-Béranger). Lac Achard is part of the Sensitive Natural Area (ENS) "Plateau de l'Arselle et lac Achard". It is also located in a Natura 2000 zone. As a result, fires, wood gathering, camping, picking plants, fishing and swimming (even for dogs) are strictly prohibited (offenders risk a fine). Dogs must be kept on a leash. Bivouacking is allowed from sunset to sunrise (except from May 1 to October 30 during the peak summer season). → For the moment, drone flights are not on the list of prohibitions. Let's hope it stays that way, provided drone pilots keep their flights short. Close to GRENOBLE

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
