Tête de Torraz - La Giettaz

Mountain · Savoie

GPS coordinates	45.86300, 6.53420
Elevation	1,772 m
Maximum height	120 m max
Access	Direct access by car
Nearest aerodrome	Megève Altiport (LFHM) 10.0 km SE · spot 302 m higher
Spot reference	317014

Spot location and restrictions (Drone-Spot map image)

Sun (local times, UTC+01:00)

Day	Dawn	Sunrise	Sunset	Dusk	Day length	Golden hour
Sat 21 Nov	07:09	07:42	16:57	17:30	9 h 15	07:42–08:29 · 16:11–16:57
Sun 22 Nov	07:11	07:43	16:57	17:29	9 h 13	07:43–08:30 · 16:10–16:57
Mon 23 Nov	07:12	07:45	16:56	17:29	9 h 11	07:45–08:32 · 16:09–16:56

Nearby aerodromes

Aerodrome	Type	Distance	Elevation
Megève Altiport	Aerodrome	10.0 km SE	1,470 m
Altisurface de Saint-Roch Mayères	Aerodrome	10 km NE	1,560 m
Centre Hospitalier Heliport	Heliport	12 km NE	546 m
Altiport du Col de Cenise	Aerodrome	19 km N	1,724 m

Description

At the summit of the Tête de Torraz, at 1,930 meters of altitude, which is easily reached by a chairlift from Le Plan de la Giettaz, the panorama is simply grandiose. On one side, the iconic silhouette of Mont Blanc can be made out through the morning haze; on the other, the majestic cliff barrier of the eastern side of the Aravis unfolds its impressive rock wall over more than 20 kilometers from north to south. Near LA CLUSAZ

Before every flight: check the UAS zones map, NOTAMs and temporary areas, the weather and the Kp index.

Preparing the flight

Pre-flight Check-List

- ☐ Area checked: UAS zones, restrictions, protected areas
- ☐ NOTAMs and temporary areas checked
- ☐ Weather: wind, gusts, rain, visibility; Kp index
- ☐ Operator number displayed on the drone
- ☐ Training certificate or licence with me
- ☐ Third-party liability insurance checked
- ☐ Batteries charged: drone, controller, phone
- ☐ Propellers, motors and frame in good condition
- ☐ Memory card inserted and empty
- ☐ Software up to date, compass and IMU calibrated
- ☐ Return to home: home point and return height set
- ☐ Electronic signalling or remote ID active
- ☐ Take-off area clear, people informed and at a distance
- ☐ Observer present for FPV flights

Key rules of the open category

Recreational flying in France: European open-category rules, applied by the DGAC.

- Maximum height: 120 m above the ground, lower where a restriction requires it.
- Always keep the drone in sight; when flying FPV, an observer keeps it in sight next to you.
- Never fly over crowds and keep the distances of your subcategory (A1, A2 or A3).
- Respect UAS geographical zones: around aerodromes, prohibited or restricted areas, protected areas, sensitive sites.
- Register as an operator if the drone weighs 250 g or more or carries a camera (toys excepted), and display the number on the drone.
- Training: online A1/A3 certificate from 250 g or for a class C1 drone; A2 certificate to fly closer to people with a class C2 drone.
- Always give way to manned aircraft and land if one approaches.
- Respect privacy: no images that identify people without their consent; aerial photography is prohibited in some areas.
- Check your third-party liability insurance.
- In France: registration and training on AlphaTango (DGAC); a drone of 800 g or more must broadcast electronic signalling (or the remote ID of class-marked drones).

Non-exhaustive summary: rules change. Reference: the DGAC open-category guide and the country's regulations.
